

TROLLEY MOUNTED FLUX RECOVERY UNIT

WFR Series flux recovery units are used along with SAW systems to recover the unused flux during welding. These units are available in both Trolley type and Column and boom mountable type. These units when used along with SAW systems minimize the wastage of flux as well as reduce the contamination of the flux as it is directly collected few inches from the welding point.

Technical Specifications

Model	WFR-1500
Vacuum Producer	Multi Stage Turbine
Vacuum	1500 mm WG
Discharge	325 m ³ /hr
Electric Motor	3 hp, 3 Phase
Starter	DOL
Drive	Belt Drive
Filter	Dual Satin Filter Bag
Recovery Hose	Dia 38mm x 5 mtr. Long
Hopper Capacity	30 kgs.
